## Full-Stack Developer Exam

1. Create a simple Signup Form with the layout in the zip file using React JS, HTML, and CSS for front-end and PHP for Back-End API Requests.
   a. Must be a responsive layout.
   b. Must have the following fields:
      i. Name:
      ii. Email Address: (impose a validation on the proper email format and must not be a duplicate)
      iii. Password
         1. Minimum of 8 and a maximum of 16 alphanumeric characters with at least 1 special character
         2. Must be validated upon input.
   c. Redirect to another page with a message.
   d. The output is to have a successful submission of the details.

   Condition: Must not have a duplicate to the records. Only one email should exist in the database records.

2. Create a simple POST and GET request for the details submitted in the form.
3. Feel free to use the tools you are most comfortable with.

Submission Instructions:

   - Should submit within 24hrs.
   - Compress both your source code and paste the sample API requests with a screenshot to a zip file.
   - Email the file to helen.mari@coexstar.ph.
